FOREIGN AGRICULTURAL TRADE OF THE UNITED STATES

Digest

Farm Product Exports to 50 Major Countries, Fiscal Years 1971-76 (see p. 5). Tables show the value of U.S. agricultural exports to over 150 countries and territories for fiscal years 1971 through 1976. More detailed data are shown for the 50 principal destinations and for major commodity groups. This will be the final series of exports based on a July-June year. Henceforth, the fiscal year will be on an October-September basis.

* * * * *

Agricultural Imports From 50 Countries, Fiscal Years 1971-76 (see p. 27). The trend toward declining shares for tropical products in the value of U.S. agricultural imports was reversed during 1976 because of higher prices for coffee, cocoa, and certain other noncompetitive items. Brazil continued as the leading supplier of imports, while imports from the Philippines dropped sharply.

* * * * *

Agricultural Exports to the EC Reach Record \$5.76 Billion in Fiscal 1976 (see p. 50). Over one-fourth of U.S. agricultural exports went to the European Community in fiscal 1976. The record \$5.76 billion value was 8 percent higher than a year earlier, reflecting gains in both variable levy and nonvariable levy products. Feed grains, wheat, rice, beef, poultry, oilseeds, and fruits and vegetables showed increases.

* * * * *

U.S. Imports Under Quarantine Regulations, Fiscal 1976 (see p. 65). More than 160 different varieties of fruits and vegetables under plant quarantine import regulations are tabulated by country of origin and entry port.

* * * * *

Farm Export Value Up 13 Percent in July-September (see p. 84). At \$5.35 billion, U.S. agricultural exports during the July-September period were 13 percent above the year-earlier level. Volume grew almost 16 percent. Increases for feed grains, rice, soybean meal, prepared feeds, animal products, fruits, and vegetables contributed to the gain. Exports of wheat, soybeans, and cotton declined.

Agricultural Imports In July-September Total \$2.8 Billion (see p.119). Agricultural imports during the July-September quarter totaled \$2.8 billion, 17 percent above the year-earlier level and about 2 percent more than during April-June 1976. Value gains were primarily concentrated in noncompetitive commodities such as coffee, cocoa, rubber, tea, essential oils, crude drugs, and spices. Significantly higher prices for coffee, cocoa, and crude rubber accounted for most of the value increases. Non-competitive commodities rose to 43 percent of all agricultural imports, compared with 34 percent in July-September 1975.

* * * * *

Selected Prices of International Significance (see p.135). In September, international commodity prices were mixed sufficiently so that the Dow Jones commodity spot price index, reflecting these price movements, was nearly the same as it was in August. Wheat, imported cow meat, sugar, and rubber prices declined, while corn, soybean, soybean meal, rice, cotton, coffee, and cocoa bean prices strengthened.

* * * ERRATA * * *

On page 22 of the October 1976 issue, the last paragraph should read as follows: "As in recent years, P.L. 480 Title II exports accounted for about one-fourth of all P.L. 480 exports in fiscal 1976. However, there was a considerable decline in all Title II programs--contributions to the World Food Program, bilateral government donations, and donations through voluntary agencies."

1/ Domestic exports including Department of Defense shipments (F.A.S. value).

2/ Domestic and foreign exports excluding Department of Defense shipments (F.A.S. value).

3/ Imports for consumption (Customs value).

4/ General imports (Customs value).

SPECIAL in this issue

FARM PRODUCT EXPORTS TO 50 MAJOR COUNTRIES, FISCAL YEARS 1971-76

During the last 5 years, U.S. agricultural exports have almost tripled in value to reach \$22.15 billion in fiscal 1976. The largest annual gains occurred in 1973 and 1974, when the value of shipments jumped 60 and 65 percent, respectively. Since 1974, exports have eased up slightly to the present record high.

Substantial shifts have taken place in major markets for U.S. farm products during the past year alone. Ranked 14th in importance in fiscal 1975, the USSR moved into second place behind traditionally first-ranked Japan. Italy rose from seventh to sixth place, while Korea dropped to eighth place as India moved up to seventh. Mexico and Iran dropped down on the list as exports to those countries declined sharply.

The following tables list 50 major markets for U.S. farm products in fiscal 1976. The data are not adjusted for transshipments through Holland, West Germany, and Canada, where large amounts of grains and oilseeds are reloaded en route to other countries. Over \$507 million in bulk agricultural commodities moved through Canadian ports during fiscal 1976, for example. Destinations by commodity are shown in table 4. Insufficient information is available at this date to include shipments through Holland, Belgium, and West Germany.

Large amounts of corn and wheat recorded as being shipped to West Germany in fiscal 1976 was destined for East Germany. Fiscal 1976 shipments of wheat to East Germany were slightly less than 66,000 tons, according to export declarations filed with the Census Bureau. Export Sales, published by USDA's General Sales Manager, showed about 773,000 tons, however. ^{1/} Thus, most of the wheat indicated as going to West Germany in table 5. was transshipped to East Germany.

Export sales data for corn show that accumulated exports to East Germany totaled more than 1.5 million tons in fiscal 1976, which compares with 88,000 tons reported by the Census Bureau.

Total export value for the last 6 fiscal years to all countries can be found in table 3. This will be the last series summarizing exports on a July 1-June 30 basis. Subsequent fiscal year reports will be based on an October 1-September 30 period.

^{1/} June 17, 1976, p. 31.

Table 3.--U.S. agricultural exports: Value by country of destination, fiscal years 1971-76--Continued

Country of destination <u>1/</u>	Year ending June 30					
	1971	1972	1973	1974	1975	1976
	-- <u>1,000 dollars</u> --					
Total, all countries <u>17/</u>	7,753,270	8,046,371	12,902,076	21,292,650	21,578,315	22,146,928

1/ Because of transshipments, U.S. exports are overstated to Canada (before 1973), the Netherlands, Belgium, and Federal Republic of Germany. Exports are understated to other countries such as the United Kingdom, France, Italy, Spain, the USSR, Poland, and German Democratic Republic.

2/ New classification effective Jan. 1, 1976. Turks and Caicos Islands reported with Jamaica prior to Jan. 1, 1976.

3/ Prior to January 1, 1972, included in Arabian Peninsula States, n.e.c.

4/ Prior to May 1, 1972, included in Pakistan.

5/ New classification effective Jan. 1, 1976. Previously included under the former designation "Southern and Southeastern Asia, n.e.c.," now classified as Southern Asia, n.e.c.

6/ Beginning June 1, 1972, included in Japan.

7/ Prior to January 1, 1972, included in New Zealand and Western Samoa.

8/ Prior to January 1, 1971, included in British Western Pacific Islands.

9/ Prior to January 1, 1971, included in Spanish Africa, n.e.c., and Equatorial Guinea.

10/ Prior to January 1, 1971, included in Western Africa, n.e.c.

11/ Prior to January 1, 1971, included in Burundi and Rwanda.

12/ New classification effective January 1, 1976. British Indian Ocean Territory reported partly with Seychelles and partly with Mauritius prior to January 1, 1976.

13/ Prior to January 1, 1971, included in Malagasy Republic.

14/ New classification effective Jan. 1, 1975. Previously included with the Republic of South Africa.

15/ Prior to January 1, 1971, included in Southern Africa, n.e.c.

16/ Transshipments through Canada where final destination is not known.

17/ Totals may not add due to rounding.

AGRICULTURAL IMPORTS FROM 50 COUNTRIES, FISCAL YEARS 1971-76

Over the past 5 fiscal years, the value of U.S. agricultural imports has risen from \$5.83 billion to \$10.1 billion. During the 4 years, 1972-75, noncompetitive commodities--largely tropical products--declined as a share of the total, shifting relative positions of origin countries so that those supplying products competitive with items domestically grown became more important. In fiscal 1976, however, because of rising prices of many tropical products, noncompetitive agricultural imports grew to 48 percent of the total from only 29 percent in fiscal 1975.

Brazil continued to be the largest source for imported farm products in fiscal 1976. About three-fourths of U.S. agricultural imports from Brazil were tropical commodities, mainly coffee and cocoa. Prices for these items rose sharply and largely offset a steep drop in competitive items, primarily sugar.

Mexico moved into second place among principal sources, with increased coffee prices more than compensating for sharply lower sugar exports. Australia, Canada, and Colombia moved up behind Mexico, while the Philippines fell to sixth position from second because shipments of sugar and coconut oil were substantially lower.

Table 6.--U.S. agricultural imports: Quantity, value, percent change, and principal sources by commodity, fiscal years 1974/75 and 1975/76

Commodity or commodity group	Unit	Quantity		Change	Value		Change	Principal sources (1976 value)
		1974/75	1975/76		1974/75	1975/76		
		-- Thousands --		Percent	-- 1,000 dollars --	Percent

The footnotes are enumerated on the following page.

Table 7.--U.S. agricultural imports: Value by country of origin, fiscal years 1971-76--Continued

Footnotes to the preceding three pages are as follows:

- 1/ New classification effective Jan. 1, 1976. Turks and Caicos Islands and Cayman Islands reported with Jamaica prior to Jan. 1, 1976.
- 2/ Prior to January 1, 1972, included in Arabian Peninsula States, n.e.c.
- 3/ Prior to May 1, 1972, included in Pakistan.
- 4/ New classification effective Jan. 1, 1976. Previously included under the former designation "Southern and Southeastern Asia, n.e.c.," now classified as Southern Asia, n.e.c.
- 5/ Beginning June 1, 1972, included in Japan.
- 6/ Prior to January 1, 1972, included in New Zealand and Western Samoa.
- 7/ Prior to January 1, 1971, included in British Western Pacific Islands.
- 8/ Prior to January 1, 1971, included in Spanish Africa, n.e.c. and Equatorial Guinea.
- 9/ Prior to January 1, 1971, included in Western Africa, n.e.c.
- 10/ Prior to January 1, 1971, included in Burundi and Rwanda.
- 11/ New classification effective Jan. 1, 1976. British Indian Ocean Territory reported partly with Seychelles and partly with Mauritius prior to Jan. 1, 1976.
- 12/ Prior to January 1, 1971, included in Malagasy Republic.
- 13/ New classification effective Jan. 1, 1975. Previously included with the Republic of South Africa.
- 14/ Less than \$500.
- 15/ Prior to January 1, 1971, included in Southern Africa, n.e.c.
- 16/ Totals may not add due to rounding.

AGRICULTURAL EXPORTS TO THE EC REACH RECORD \$5.76 BILLION IN FISCAL 1976

The European Community (EC) continued to be the largest buyer of U.S. farm products in fiscal 1976. As in the previous 2 years, over one-fourth of the total value of U.S. agricultural exports went to the EC. West Germany and Holland are the main destinations, followed by Italy, the United Kingdom, France, and Belgium.

A record \$5.76 billion worth of U.S. farm products were shipped to the EC during fiscal 1976--8 percent more than in fiscal 1975. Feed grains, wheat, rice, beef, and poultry--commodities covered by the EC's variable import duty system--accounted for most of the gain. Exports subject to variable levies were up 13 percent to \$2.22 billion. Agricultural exports not subject to variable duties, including those with fixed tariff rates, rose almost 6 percent above their year-earlier level to \$3.54 billion.

A large part of U.S. feed grain exports move to EC destinations. Although some are transshipped to countries outside the EC area--for instance, about 1.5 million tons went to East Germany from West Germany in fiscal 1976--EC countries took over 11 million tons, or one-fourth of total U.S. feed grain shipments abroad.

Oilseeds and products make up a large proportion of nonvariable levy items shipped to EC destinations. Soybean shipments reached a record 7.5 million tons in fiscal 1976, more than 55 percent above fiscal year 1975's 4.8 million tons. Lower prices, however, held the value increase down to only 12.5 percent. The EC accounted for almost half of total U.S. soybean exports in fiscal 1976, up from 45 percent in the preceding year. Holland and West Germany are the principal markets, but shipments to Italy, Belgium, and the United Kingdom have also expanded.

Oilcake and meal shipments to EC countries over the last 6 years remained nearly level at just under 3 million tons. About 64 percent of U.S. oilcake and meal exports went to EC markets in fiscal 1976, down from 70 percent in fiscal 1975. Expanded crushing capacity on the Continent resulted in increased shipments of beans for processing rather than larger meal imports.

Fruit and vegetable exports to the Community gained 30 percent in fiscal 1976 to a record \$265 million. Fresh citrus, dried fruits, and potatoes showed strong growth.

Somewhat offsetting the gains during fiscal 1976 were declines for cotton, tobacco, tallow, and lard.

*Note: Does not include commodities transshipped through Canadian ports to the EC. Data not adjusted for transshipments to non-EC members.

1/ Preliminary.

2/ Grains, poultry, and pork were subject to variable levies beginning on July 30, 1962; rice, on Sept. 1, 1964; and beef and dairy products on Nov. 1, 1964.

3/ Lard for food is a variable-levy commodity, while lard for industrial use is bound in the General Agreement on Tariffs and Trade (GATT) at 3 percent ad valorem. U.S. lard is for food use.

4/ Although canned poultry and pork variety meats are subject to variable levies, these cannot exceed the amount of import duties bound in GATT.

5/ Variable-levy on sugar-added content.

6/ Not separately classified prior to July 1971.

1/ Preliminary.

2/ Grains, poultry, and pork were subject to variable levies beginning on July 30, 1962; rice, on September 1, 1964; and beef and dairy products, on November 1, 1964.

3/ Lard for food is a variable-levy commodity, while lard for industrial use is bound in the General Agreement on Tariffs and Trade (GATT) at 3 percent ad valorem. U.S. lard is for food use.

4/ Although canned poultry and pork variety meats are subject to variable-levies, these cannot exceed the amount of import duties bound in GATT.

5/ Variable-levy on sugar-added content.

6/ Not separately classified prior to July 1971.

1/ Preliminary.

2/ Grains, poultry, and pork were subject to variable levies beginning on July 30, 1962; rice, on September 1, 1964; and beef and dairy products, on November 1, 1964.

3/ Lard for food is a variable-levy commodity, while lard for industrial use is bound in the General Agreement on Tariffs and Trade (GATT) at 3 percent ad valorem. U.S. lard is for food use.

4/ Although canned poultry and pork variety meats are subject to variable levies, these cannot exceed the amount of import duties bound in GATT.

5/ Variable-levy on sugar-added content.

6/ Not separately classified prior to July 1971.

SPECIAL in this issue

U.S. IMPORTS UNDER QUARANTINE REGULATIONS, FISCAL 1976

After 2 successive years' of decline, imports of fruits and vegetables under permits issued by USDA's Plant Protection and Quarantine Programs showed a slight gain in fiscal 1976. Such imports totaled 6.4 billion pounds, compared with less than 6.2 billion pounds in fiscal 1975, 6.75 billion in 1974, and the record of nearly 7 billion in fiscal 1973. ^{1/}

Commodity increases in fiscal 1976 over the previous year included bananas, cucumbers, grapes, melons, peppers, plantains, and squash. These gains were partially offset by reduced entries of garlic, onions, oranges, strawberries, and tomatoes.

Over 160 varieties of fruits and vegetables entered U.S. ports in fiscal 1976. Fresh bananas accounted for 65 percent of the total volume, followed by tomatoes, melons, cucumbers, peppers, strawberries, and grapes. Fruit and vegetable entries through 47 U.S. ports are shown in the accompanying tables. The largest ports in fiscal 1976 were Mobile, Ala., (which also reports entries through Pascagoula, Biloxi, and Gulfport, Miss.), Nogales, Ariz., followed by New York City and Los Angeles. Transshipments of fruits and vegetables through U.S. ports to other countries are also shown.

Plant Protection and Quarantine statistics provide detailed data on fruits and vegetables recorded in import "basket" classifications. However, differences between quarantine entries and U.S. Census Bureau import data are primarily attributable to dissimilar reporting periods and commodity definitions. In addition, fruits and vegetables from Canada are not reported in Plant Quarantine statistics.

^{1/} See Foreign Agricultural Trade of the United States, Sept. 1975, Oct. 1974, and Nov. 1973.

Export Highlights

FARM EXPORT VALUE UP 13 PERCENT IN JULY-SEPTEMBER QUARTER

Nearly \$1.8 billion worth of U.S. farm products were exported during September, a slight increase over August's \$1.76 billion, and well above last September's \$1.6 billion.

During the July-September quarter, agricultural exports stood at \$5.35 billion, or 13 percent higher than a year earlier. Export volume of the major commodities, at 26.4 million tons, was up nearly 16 percent. Gains were registered for feed grains, protein meals, prepared feeds, rice, animal products, fruits, and vegetables.

Feed grain exports were well ahead of year-earlier levels at 11 million tons. Western European demand for animal feed materials--feed grains, oilseed meals, and forages--surged ahead of last year's rates because of drought. Feed grain shipments to European Community members rose 43 percent to 4.25 million tons; value moved up 35 percent to \$515 million.

Eastern European countries--also affected by drought, and attempting to raise meat production--took substantially more feed grains than a year earlier. Feed grain exports to COMECON members exceeded 2 million tons, compared with 370,000 tons in July-September 1975. (The above figures are not adjusted for transshipments through Canada, Holland, Belgium, or West Germany.)

Feed grain shipments to other countries whose economies are recovering from last year's recession have also grown. Japan, Korea, Taiwan, Spain, and Greece were larger markets in the last quarter.

Wheat exports, in contrast, were less than in July-September 1975. Reduced shipments to Brazil, the USSR, and Japan were not offset by increases for other countries, primarily OPEC members, Korea, Egypt, and Chile. Wheat export prices are also lower this year, yielding less foreign exchange. Total volume fell 10 percent to 8.4 million tons, whereas value dropped 18 percent to \$1.2 billion.

Soybean exports for the quarter slipped 15 percent behind July-September 1975 to 2 million tons. However, because of higher prices, value declined somewhat less--by 7.5 percent to \$492 million. Although shipments to Japan were up, most other markets declined.

Brisk foreign demand for protein feed--primarily soybean meal--boosted exports to 1.2 million tons, or 27 percent more than a year earlier. Price increases raised value 48 percent to \$213 million. East European countries, Canada, and France took most of the export increase.

Fruit and vegetable exports totaled \$340 million, up 23 percent from July-September 1975, with large gains in pulses, potatoes, and most fresh fruit types. West European countries, Canada, Japan, and Eastern Europe were important markets.

In addition to the reductions for wheat and soybeans, cotton shipments fell behind year-earlier rates to 893,000 bales, but, due to higher prices, value rose 15 percent to \$281 million.

Table 31.--Export quantities of selected commodities,
July-September and September 1975 and 1976

2/ NEW CLASSIFICATION EFFECTIVE JAN. 1, 1976 EXCLUDES TURKS, CAICOS, AND CAYMAN ISLANDS.

NOTE: MNO = 1,000 HEAD OR PIECES
MLB = 1,000 POUNDS
MRBA = 1,000 RUNNING BALEM
MGAL = 1,000 GALLONS
MMT = 1,000 METRIC TONS
MBU = 1,000 BUSHELS
MSTN = 1,000 SHORT TONS

Import Highlights

AGRICULTURAL IMPORTS IN JULY-SEPTEMBER TOTAL \$2.8 BILLION

September's agricultural imports were valued at \$914 million, bringing the July-September quarterly total to \$2.8 billion. Most of the 17-percent advance over the year-earlier level occurred in July and August, as September's value dropped below last year's \$945 million level.

Noncompetitive imports rose 48 percent over their year-earlier value, totaling \$1.2 billion and accounting for 43 percent of all agricultural imports, compared with 34 percent a year earlier. The sharp value gain was largely due to higher prices for coffee, cocoa, and rubber. The significantly increased values for coffee and rubber contrasted with reduced tonnages. Import unit values for green coffee averaged \$1.14 per pound in July-September, compared with 58 cents a year earlier. Dry crude rubber averaged 36 cents per pound against 23.5 cents last year.

Competitive farm product imports for the July-September quarter remained near their year-earlier value at \$1.6 billion. Increases for live animals, meat, dairy products, wool, fruits and vegetables, wine, and tobacco were offset by a substantial decline in sugar values. Sugar import value in July-September, at \$344 million, was 40 percent below the year-earlier value, although volume rose slightly to nearly 1.4 million tons. Average unit values fell by \$149 per ton to \$251. Large supplies of raw cane sugar and depressed consumption levels following last year's high prices contributed to lower import prices. To protect domestic producers, the President raised import duties to 1.875 cents per pound from .625 cents on September 21.

Beef and veal import volume rose above the July-September 1975 level to 398 million pounds, but higher prices resulted in a 35 percent value gain. An increase in volume in September from preceding months probably reflected anticipated imposition of quotas under the Meat Import Act; the quotas took effect on October 9.

The meat import quota for 1976 was set at 1,233 million pounds, or 110 percent of the adjusted base quantity of 1,120.9 million pounds. Imports under the Meat Import Act--fresh, chilled, or frozen beef, veal, mutton, and goat meat--amounted to over 1 billion pounds in January-September versus 933.5 million pounds a year earlier.

Cheese imports in July-September totaled 48 million pounds--23 percent above the year-earlier volume. Higher prices raised value by 36 percent to \$52 million. Strong import demand for Emmentaler and Italian types coupled with higher prices accounted for the increase.

Apparel wool imports doubled during July-September from year-earlier levels, reaching 12 million pounds and \$14 million. Anticipated supply shortages due to drought in Australia and increased demand by mills contributed to this increase.

Fruit and vegetable imports were almost one-third higher in value than the July-September quarter last year. Purchases of canned pineapples, mushrooms, olives, and tomatoes were well above year-earlier levels.

International Price Highlights

SELECTED PRICES OF INTERNATIONAL SIGNIFICANCE

by
Richard Hogeboom and H. Christine Collins

In September, international commodity prices were mixed sufficiently so that the Dow Jones commodity spot price index, reflecting these price movements, was nearly the same as it was in August. Wheat, imported cow meat, sugar, and rubber prices declined, while corn, soybean, soybean meal, rice, cotton, coffee, and cocoa bean prices strengthened.

In September, the U.S. Gulf ports price for wheat, at \$122 a ton, was 5 percent lower than in August and 24 percent lower than it was a year earlier. U.S. and Canadian export prices for Dark Northern Spring (DNS) and Canadian Western Red Spring (CWRS) wheat slid 7 percent, reflecting the harvest of these wheat market classes. The c.i.f. Rotterdam prices for all three market classes have also weakened because of generally good 1976 wheat crops. The Canadian forecast for a record wheat crop and the Soviet announcement of a record USSR grain crop were major factors in reducing wheat prices.

In contrast, the U.S. export price for corn strengthened slightly in September to \$120 a ton on the news of lowered expectations for the corn crop. In the Rotterdam market, U.S. corn and sorghum and Argentine corn made price gains. The price differential between HRW wheat and No. 2 yellow corn was narrow enough to prompt farmers to feed wheat. A year earlier, the price differential between the two commodities had been extremely wide.

In the European Community, threshold prices have risen from a year ago. With the recent softening of prices, particularly in wheat, variable levies that apply to U.S. grain exports have risen sharply. In September, EC import variable levies applied to wheat (other than durum) were \$70 a ton--quadruple the September 1975 level. September EC corn import levies were \$45 a ton, 150 percent higher than a year earlier, and sorghum levies were \$50 a ton, double the year-earlier level. These levies are applied to U.S. grain before it enters the internal EC market. The levies plus the c.i.f. Rotterdam price represent the actual price that EC grain users pay for U.S. grain and the price at which U.S. exporters compete with internal EC grain suppliers.

The Gulf ports soybean export prices rebounded in September to \$256 a ton. The c.i.f. Rotterdam prices for soybean and soybean meal also strengthened. Brisk trading for soybean meal in Japan and Western Europe and the prolonged drought over the U.S. soybean producing areas have helped lift these prices.

The Osaka price for cotton strengthened slightly to 79 cents a pound.

Among import commodities, coffee continued to strengthen in price because of the tight supplies, the lack of offerings by producing countries, and heavy purchases by U.S. dealers to assure supplies. The September New York spot price for Santos No. 4 coffee was \$1.51 a pound, continuing the strong upward price trend that has been in effect for more than a year.

Cocoa bean prices also continued their strong upward drive, reaching \$1.29 a pound in September. Inclement weather in West Africa, where the crop is soon to be harvested, and in Brazil, where the crop is to be harvested in May, is resulting in reduced estimates in their upcoming crops and a continued strengthening of prices.

In contrast, sugar prices continued to decline in September, as a snowballing effect occurred. There are currently ample supplies of raw sugar in the world market. In anticipation of still lower future prices, several Latin American countries began selling sugar in the world market. The New York spot price, at 9.8 cents a pound, was 13 percent lower than it was in August.

At the Caribbean ports, raw sugar destined for the U.S. market was at 8.4 cents a pound in September--0.25 cents a pound higher than that destined for the world market.

Crude rubber prices declined slightly to 40 cents a pound and imported cow meat prices reached 70 cents a pound.

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such through U.S. Customs.

EXPORTS The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and planes engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in non-agricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. (USDA payments are excluded from the export value.) Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known to him at the time of shipment from the United States, to which the commodities are to be shipped in their present form. Except for Canada, export shipments valued at \$251-\$999 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

IMPORTS Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.
